

## Create An Account In Sendgrid

Date	15/11/2022
Team ID	PNT2022TMID53883

The screenshot displays the Twilio SendGrid dashboard interface. On the left is a sidebar menu with the user's name 'Rama Krishnan' at the top, followed by navigation links: Dashboard, Email API, Marketing, Design Library, Stats, Activity, Suppressions, Settings, and Twilio SMS (marked as 'NEW'). At the bottom of the sidebar, there is a 'REPUTATION' bar at 100% and a 'VIEW ACCOUNT USAGE' link. The main content area features a large 'Welcome, Rama!' header with a sub-header 'To get up and running quickly, please follow the steps outlined below.' and an illustration of two people running. Below this is a blue banner that reads 'Send your first emails with Twilio SendGrid'. The primary section is titled 'Create a sender identity' and explains that a sender identity is the 'from' email address. It offers two methods: 'Create a Single Sender' (highlighted with a blue button) and 'Authenticate a domain instead'. An example email header is shown with 'Your Business' as the sender name and 'yourdomain@your\_business.co.uk' as the email address. At the bottom, a section titled 'Send your first email' includes a message: 'Please create a sender identity before sending your first email.'

**Welcome, Rama!**

To get up and running quickly, please follow the steps outlined below.

**Send your first emails with Twilio SendGrid**

**Create a sender identity**

Before sending email, you'll need to create a sender identity. There are [two ways](#) to do this, but we recommend creating a Single Sender to get set up quickly and test your email integration.

Your sender identity is the "from" email address recipients will see in their inbox. [Learn more](#)

**Create a Single Sender** | [Authenticate a domain instead](#)

**Send your first email** | Please create a sender identity before sending your first email.
